Personal statement

I am a final semester student of Bachelors in Computer Science in COMSATS University Lahore. I want to pursue my career as an efficient and productive computer scientist. I endeavor to achieve professional mastery and quality workmanship. Currently, I am seeking an entry-level position in a dynamic and growing organization that encourage me to enhance my technical knowledge and creative skills.

Skills

- Have developed various websites using HTML, CSS, Bootstrap, JavaScript, Version Control/Git.
- Basic knowledge of React, Redux, Node, and Databases.
- I have also ample knowledge of other programming languages i.e. Python, Java, C/C++.
- Strong leadership, communication, and collaboration skills.

Experience

Freelance Web Developer (2019 - Current)

- Developed an android application using cryptography techniques (*CodeTalker*).
- Designed a Background color generator (*Random Gradient Color Generator*).
- Developed authentication app in react native.
- Built an artificially intelligent Chabot using python and machine learning (*TESS*).
- Created a website that is based on React and JavaScript (*RoboFriends*).
